Plastic Packaging Details

Sr. No.	Name	Material	Thickness(µm)	Category	Purpose
1.	Bag	HDPE	20	II	1. Appropriate flexibility must be maintained from the perspective of protecting contents 2. Reduction of packaging weight for the purpose of decreasing environmental impact
2.	Bag	LDPE	25	II	1. Appropriate flexibility must be maintained from the perspective of protecting contents 2. Reduction of packaging weight for the purpose of decreasing environmental impact
3.	Foam Cushioned bag	EPE (LDPE)	50	II	To protect accessory of camera from shocks, impacts, and scratches during storage and transportation.
4.	Bag (Zipper)	LDPE	40	II	1. Appropriate flexibility must be maintained from the perspective of protecting contents 2. Reduction of packaging weight for the purpose of decreasing environmental impact
5.	Bubble wrap bag	LDPE	50	II	For identifying antistatic packaging materials
6.	Molded foam cushioning	EPS (PS)	-	I	To protect accessory of camera from shocks, impacts, and scratches during storage and transportation.

7.	Molded foam cushioning	EPE (LDPE)	-	I	To protect accessory of camera from shocks, impacts, and scratches during storage and transportation.
8.	Molded foam cushioning	EPP (PP)	-	I	For identifying antistatic packaging materials and to protect accessory of camera from shocks, impacts, and scratches during storage and transportation.
9.	Molded foam cushioning	PS+PE	-	I	To protect accessory of camera from shocks, impacts, and scratches during storage and transportation.
10.	Molded foam cushioning	PP	-	I	To protect accessory of camera from shocks, impacts, and scratches during storage and transportation.
11.	Case	PET	-	I	To securely hold and organize camera components, preventing movement and potential damage during transit.
12.	Case	PP	-	I	To securely hold and organize camera components, preventing movement and potential damage during transit.
13.	Bag	PP	30	II	1. Appropriate flexibility must be maintained from the perspective of protecting contents 2. Reduction of packaging weight for the purpose of decreasing environmental impact
14.	Sheet	PP (Box: cardboard)	250	II	To securely hold and organize camera components, preventing movement and potential damage during transit.
15.	Case	PP	-	I	To securely hold and organize camera components, preventing movement and potential damage during transit.
16.	Sheet (Protective)	PET or LLDPE	51	II	To protect accessory of camera from scratches during storage and transportation. PET: D7500 model PE: All models other than D7500
17.	Film (Covering)	PE	920	II	To protect accessory of camera from scratches during storage and transportation.
18.	Sheet (Protective)	PP	150	II	To protect accessory of camera from scratches during storage and transportation.
19.	Sheet (Cushion)	EPE	2000	II	To protect accessory of camera from scratches during storage and transportation.
20.	Sheet (Protective)	PP	100	II	To protect accessory of camera from scratches during storage and transportation.
21.	Foam cushioning sheet	EPE	-	I	To provide shock absorption and prevent scratches, protecting cameras from damage during transportation.
22.	Tape	PE/Paper	-	III	To seal and secure packaging, keeping camera components safe and preventing accidental opening during transit.
23.	Stretch Film	PE	12	II	1. Appropriate flexibility must be maintained from the perspective of protecting contents 2. Reduction of packaging weight for the purpose of decreasing environmental impact
24.	Cover	PP	-	I	To securely hold and organize camera components, preventing movement and potential damage during transit.
